

Dear Dr. Payne,

My son Jacob received your computer. Jacob was thrilled. Jacob has autism and is 8 years old.

Jacob is a wonderful child. He loves to read, sing country songs, and

type on the computer.

Jacob's writing skills are below age level but you should see him type, and do his school work on a computer. It's amazing!

Jacob's 6 year old brother, Cody, also has autism and is starting to use the computer. He loves to play Solitaire. I know that Jacob and Cody will have many hours of pleasure due to your generosity!

Thank-You!

P.S.
