Dr. James Payne
434 N. Center Street
Northville, Michigan 48167

Dear Dr. Payne,

I want to thank you for the computer you donated to a client of our agency. This generous gift in connection with Sky-Tech Computers has made an important difference in the life of a teenage boy with hemophilia.

The Hemophilia Foundation of Michigan runs a teen leadership program called MYLIFE. Teenagers from across the state are a part of this special group of bright kids who work together to develop youth programs for other kids with hemophilia. Because hemophilia can be an isolating medical disorder, we provide an additional teen chat line to allow these kids to connect for support.

One of the boys, Nick, is particularly bright, but is unable to participate in chat line events due to the fact that he did not have a computer. His family is lower income and buying a computer at this time is not a possibility. Because of your donation Nick will be able to participate in support groups on-line. He will also be able to participate in the planning of youth programs for other kids throughout Michigan.

Thank you for using your resources to benefit those who would otherwise go without. I am certain that this has made a difference in this young man's life. Keep up the good work!

Sincerely,

Colleen Joiner, MSW CSW
Client Services Coordinator
Hemophilia Foundation of Michigan
